

# Welcome to SingerWan's Etymology Compilation Site!

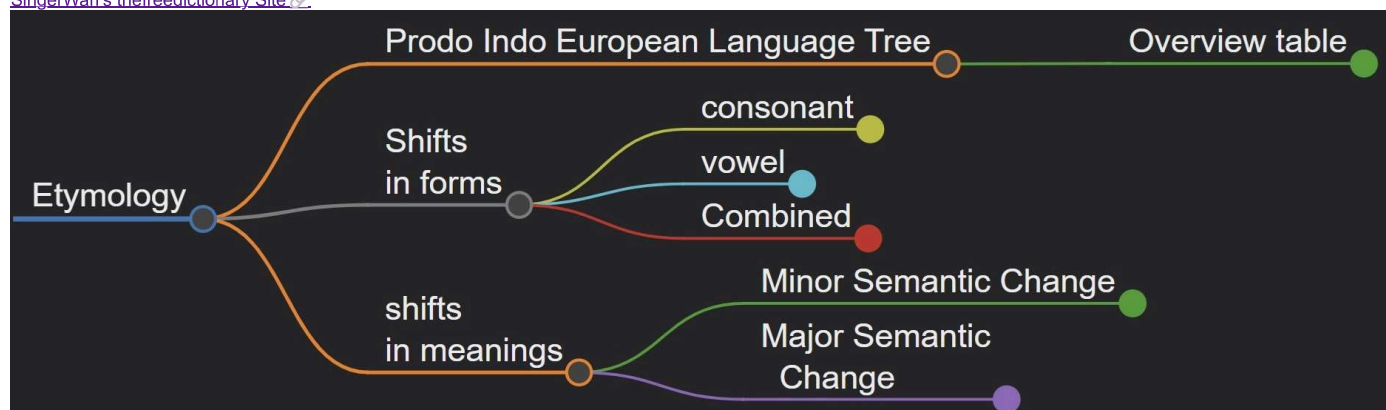

[Overview](#)

This is Page # 1 [My Portfolio Site](#)

## Greetings!

To keep this site concise and organized, I have compiled the etymology of words in a tabular form, starting from the overview and Proto-Indo-European Roots. On top of that, I have linked the Etymonline website below, which is a comprehensive online etymology dictionary, encompassing all PIE roots.

After having navigated through Etymonline website, readers can swiftly return to this site for "markmap" markdown illustration which will gives you a more dynamic view using tree structure which collapses and expands upon click. The following pictures are the example snippets of overview and \*okw- PIE root. Disclaimer: The content of this site is still in the process of being compiled, and I will continue to update it in the future. Furthermore, all the pictures used in the compilation markdown are from Bing website, and its all free to share ,modify and use commercially.
